PERSONAL PROJECTS

Restaurant Website (React and Material-UI)
- Designed and developed a responsive and visually appealing restaurant website using React and Material-UI, offering an engaging online presence for the restaurant.
- The website comprises sections for the menu, home, contact, and about us, showcasing a combination of modern design and seamless functionality.
- Implemented engaging animations for icons and images to capture the attention of visitors. Designed an attractive home page to showcase the restaurant's ambiance and cuisine.

Grade Book App using React
- Developed a feature-rich single-page application (SPA) for managing student records and grades, employing React for the front-end and various features for sorting, filtering, and searching.
- The grade book app offers a comprehensive solution for educators to efficiently organize and analyze student data.
- Enabled educators to view summary statistics, such as class averages and grade distributions, to assess student performance. Integrated data visualization components for clear and concise data presentation.

Responsive E- Commerce Website using HTML, CSS and JavaScript
- Designed and developed a fully responsive e-commerce website using HTML, CSS, and JavaScript to provide an engaging online shopping experience. The project consists of multiple pages, including the homepage, shop, blog, about us, and contact us pages, catering to a diverse range of user needs.
- Created dedicated product and product details pages with intuitive layouts, enabling users to explore product details. Implemented a user-friendly contact us page with a contact form, allowing visitors to easily reach out for inquiries or support.
- Implemented modern CSS techniques to ensure seamless functionality and aesthetics across various devices and screen sizes, enhancing user accessibility and satisfaction.

Responsive JavaScript Business Website Landing Page
- Designed and developed a dynamic business website landing page that showcases modern web development skills and advanced JavaScript concepts. The landing page features an interactive hamburger menu, diverse sections including About, Contact, and Pricing, and utilizes cutting-edge JavaScript techniques to enhance user engagement.
- Implemented a responsive hamburger menu using JavaScript, offering a seamless navigation experience on both desktop and mobile devices, enhancing user accessibility.
- Organized content into distinct sections, such as About, Contact, and Pricing, allowing visitors to quickly access relevant information and encouraging user engagement.
